

UNITED TECHNICAL SERVICES

Uniting Unrivalled Technology & Service

VISION

Differentiating ourselves by providing solutions through better understanding of customer needs.

MISSION

To continually enhance accessibility to market opportunities by establishing and building on long term key relationships with customers and stakeholders – by developing propositions and solutions that add value and drive excellent results.

UNITING UNRIVALLED TECHNOLOGY & SERVICE

United Technical Services (UTS) are pioneers in technology and have played a proactive role in the UAE since the 1960s.

Over five decades later, UTS has developed into a progressive organization that is instrumental in introducing technologies, improving quality of life, and supporting the progress of the UAE and the region.

Our strengths are built on our strategic partnerships, regional knowledge, expertise and customer understanding. UTS always provides value and never compromises on quality and efficiency. The company consistently promotes new innovations to meet growing demands and opportunities, and is committed to providing world-class products, services and solutions that meet our customers' needs.

PIONEERS IN OIL & GAS

The region's Oil & Gas industry has seen spectacular growth over recent decades. UTS is proud to have played a key role in the industry since the 1970s, putting the region firmly on the global stage.

Our comprehensive technical knowledge of the Oil & Gas sector is unrivalled. We engage in partnerships with world-class suppliers and leaders in their fields. Through our many alliances, we provide invaluable and complete solutions to Oil & Gas companies by distributing and maintaining specialized engineering equipment. Our reputation for quality and service enables UTS to respond effectively to our clients' needs. We specialize in providing innovative and technically advanced energy, drilling, and tubular products, along with a comprehensive range of services that complement upstream and downstream operations.

Our products and services include:

OCTG & Line Pipe

Drill Bits

Process Instrumentation

Heat Exchangers

Separators

Cryogenic Pumps

Liquid Handling Tanks

Turbine & Compressor Control Systems

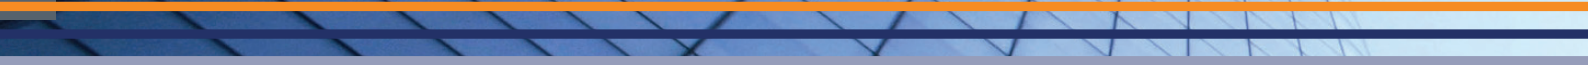

Water Treatment & Desalination

Oilfield Production Chemicals

Drilling & Stimulation Additives

Industrial Water Treatment Chemicals

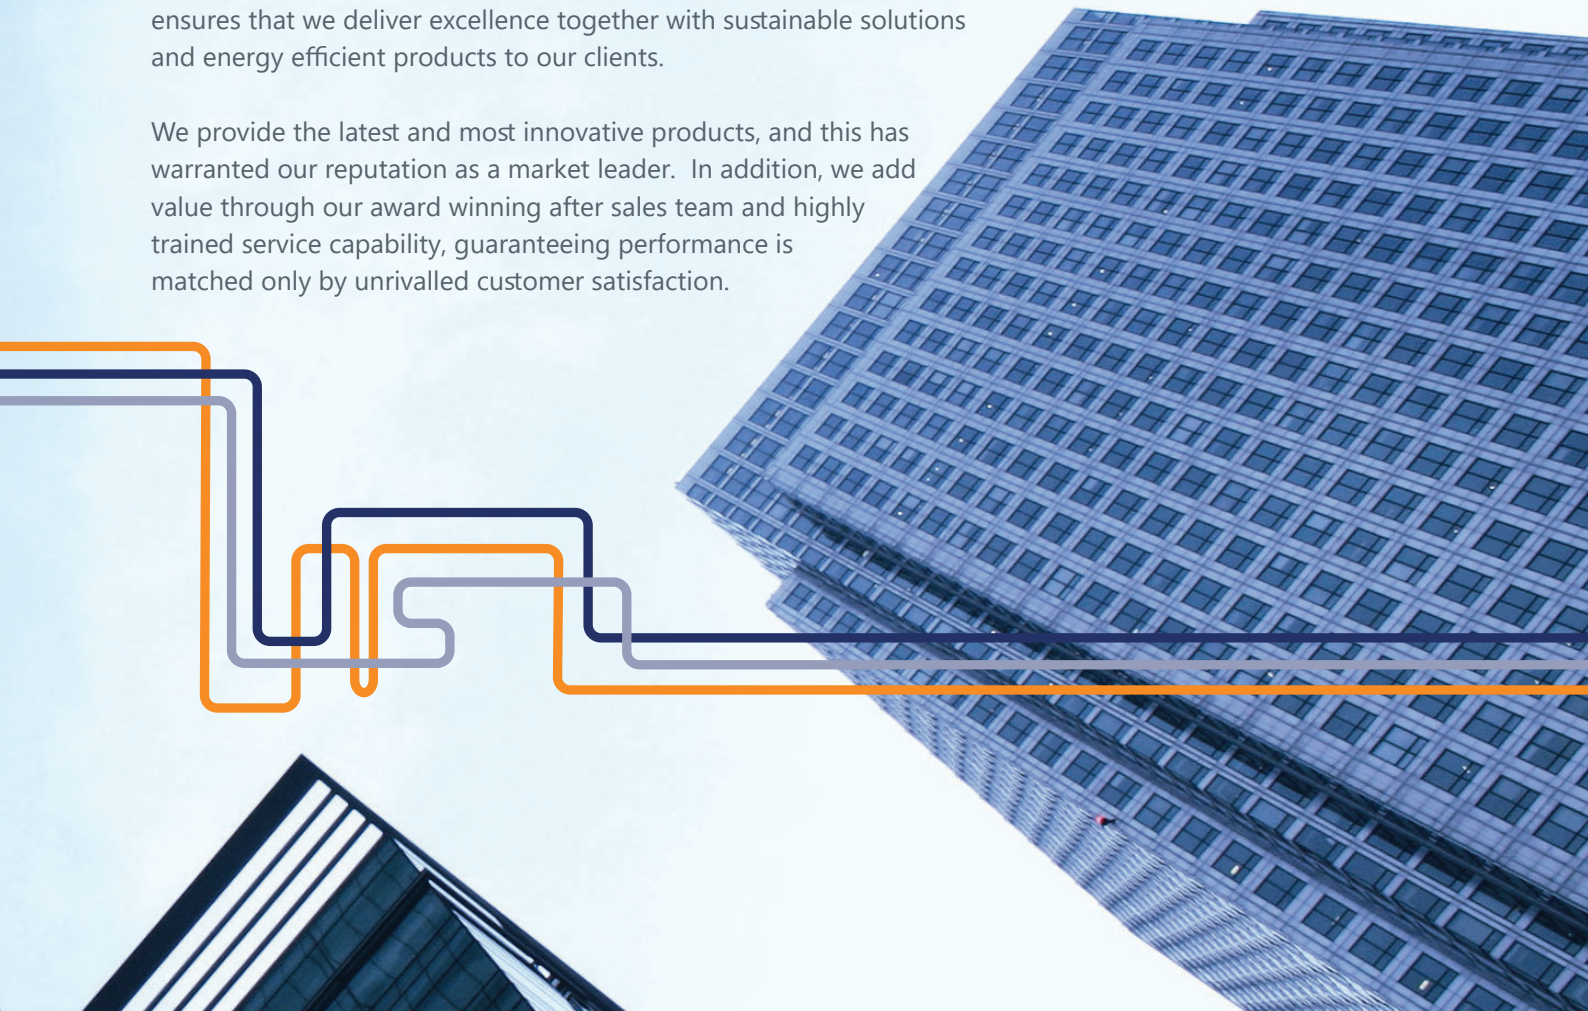

KEEPING OUR WORLD COOL

UTS has long been established as the leading force in the air conditioning market in the UAE.

Our joint venture with the world's number one manufacturer Carrier ensures that we deliver excellence together with sustainable solutions and energy efficient products to our clients.

We provide the latest and most innovative products, and this has warranted our reputation as a market leader. In addition, we add value through our award winning after sales team and highly trained service capability, guaranteeing performance is matched only by unrivalled customer satisfaction.

INNOVATIONS IN WATER TREATMENT

UTS offers a full suite of products and tailored services that ensure sustainable solutions.

We are committed to excellence in everything we do and this is reassuringly achieved through strategic partnerships with global leaders in their respective fields. UTS excels by focusing on leading technology and innovation; delivering high quality products and reliable services, and respecting the environment at all times.

Water Treatment Division

The UTS Water Treatment Division works with its partners to ensure that clients are provided with practical solutions that meet their specific needs. The division focuses on the provision of cost efficient potable water and

wastewater treatment systems through the adoption of innovative treatment and recycling methods.

We strongly believe in the need to conserve and reuse precious water resources and always seek to offer clients sustainable solutions such as the use of vacuum sanitary systems.

Our products and services include:

- Water Treatment & Desalination
- Wastewater Treatment
- Water Conservation
- Liquid Handling Tanks
- Vacuum Systems

SPECIALIZED CHEMICAL SOLUTIONS

We respond to customers' needs by supplying bespoke products which are results-driven.

CHEMICALS

UTS Chemicals offer our clients a comprehensive range of services with leading technologies and products. UTS Chemicals and our valued partners provide a full range of chemical solutions for

our clients. We serve all users in the commodity, speciality oilfield and water treatment fields.

An extensive team of in-house experts is on hand to support our clients' bespoke requirements. We are regional leaders in all water treatment needs from source water treatment to process solutions and wastewater treatment. This is supported by an analytical facility that carries out accurate real

time analysis.

Our focus on meeting strict industry guidelines and customer specifications has empowered us to lead in international standards and exceed expectations.

Our products include:

- Oilfield Production Chemicals
- Drilling & Simulation Additives
- Industrial Water Treatment Chemicals
- Fuel Additives
- Chemical Injection Pumps & Solar Power Skids
- Process Chemicals

SHAPING THE FUTURE OF INDUSTRY

UTS is proud to play an instrumental role in realizing the goals of 'Abu Dhabi Economic Vision 2030'.

A key element of this vision is the drive for economic diversification, and the view that metal industries, such as aluminium, are engines of economic growth. Aluminium is fast developing into one of the planet's most widely used metals and is set to become one of the most sought after in the forthcoming decades. Its strong, lightweight and recyclable characteristics make it indispensable and it is used in everything from automobiles to aerospace, construction to medical equipment.

As a result, UTS has strategically aligned itself with the UAE's aluminium industry as it continues to expand as a significant player in the global market. We support this journey by partnering up with key industry leaders to supply smelter equipment, spare parts, related mill services and further investment in the downstream industry.

INDUSTRY LEADING MARINE SOLUTIONS

UTS is a leading provider of a variety of services and known for its success in offering high quality products at competitive prices in the marine and offshore industry.

Our established partnerships with marine equipment makers and service providers ensure that our customers receive the finest products, services and expert support. In addition, our skilled teams are on hand to offer end-to-end solutions.

Our products and services include:

- Reverse Osmosis Plants
- Sewage Treatment Plant (Physical/ Chemical & Biological)
- Hydrophore & Hot Water Calorifier
- Sterilizers & Filters
- Marine Incinerators
- Oily Water Separators
- Inert Gas Systems
- Galley & Laundry Equipment and Layout Design
- Ballast Water Treatment Systems
- Fire Alarm & Gas Detection Systems
- Aluminium Helideck

RESULTS DRIVEN TOTAL FACILITY MANAGEMENT

At UTS we combine decades of regional experience and work with highly experienced partners to deliver focused Total Facilities Management (TFM) solutions.

UTS partners with world-leading global TFM service provider OCS to offer comprehensive asset and facilities management services. These support master developments, airports, commercial & residential communities, schools & universities, as well as the healthcare industry. Our offerings include hard services, soft services, and business support services.

One of the advantages of Total Facilities Management is that we can seamlessly deliver all services in an effective expert manner with value added elements throughout the complex supply chain.

The results are impressive: tangible savings and reassuring economies of scale.

The TFM team is also supported by Clinical & Biomedical equipment maintenance engineers, with UAE and regional expertise that spans over 25 years.

The depth of our specialist knowledge in all areas of facilities management helps us to create an FM model for you that is flexible, scalable and based on best practice. This ultimately means that you can focus on managing your core business knowing that your assets are in good hands.

LET'S GET CONNECTED

**We live in a world increasingly
driven by the amazing potential
of communications.**

As leaders in technology solutions, the Communications Division of UTS has a range of state-of-the-art products such as data communications equipment. We partner with global providers of enterprise network solutions to provide innovative products and world-class customer service that is second to none.

COMMUNICATIONS

REALIZING SUSTAINABLE MOBILITY

**UTS is the region's leader
in supplying Automated
Transport Networks (ATN).**

Over the last two decades, the ATN has become one of the most significant developments in transit technology. These automated, electric-powered, driverless vehicles, which include the Personal Rapid Transport (PRT) and Group Rapid Transit (GRT), meet the challenges of global sustainability and economic viability.

We enjoy a joint venture with 2getthere, who are global experts in ATN systems and are proud to play a role in improving transportation in the region whilst realizing reduced operational costs. Regionally, we have completed over a million trips and as the region's infrastructure continues to grow, we will continue to be the vanguard of transport technology.

OUR PEOPLE MAKE THE DIFFERENCE

**UTS ensures added value through
our follow up service for our
customers.**

SERVICE CENTER

The Service Division is led by expert engineers and technicians who offer technical support for products in our water treatment and environment sectors. The Service Center also performs annual operation & maintenance contracts for major oil sector clients.

When it comes to any of our services or products, you can be assured that we are committed to the highest standards and best global practices, each and every time.
